Strengthening the Forces:

The CAFs HEALTH PROMOTION PROGRAM COURSES

For Garrison Toronto and the GTA

In Health Promotion we have programs, services and resources to help the Defence team improve or maintain their health... both mentally, physically and socially.

The Strengthening the Forces (STF) Program is developed by CF Health Services with the support of the CDS in recognition that physical and mental fitness are essential to operational readiness.

COURSES

HP courses are scheduled quarterly and registration is open to individual members of any Unit in the GTA.

SOCIAL WELLNESS

Mental Fitness and Suicide Awareness Supervisor Training (1 day) *MITE Code

MFSA was designed specifically for the CAF. The course introduces the mental fitness continuum and explores myths around suicide. The course focus is on identifying potential warning signs and getting someone linked to formal resources.

Stress: Take Charge! (1 day)

program participants will develop an understanding of the role that stress plays in their life. Topics include: time management, the personal power grid and how to engage the relaxation response.

Managing Angry Moments (2 days)

MAM participants learn about their potential "triggers" and how to reframe potentially anger generating situations in day-to-day life. Participants develop strategies to increase their personal wellbeing and improve their relationships with others.

Inter-Comm (four x 3 hr sessions)

During the Inter-Comm course participants will learn how to improve communication within personal relationships. The focus in the course is on learning the attitudes and skills required to deal with conflict effectively.

NUTRITIONAL WELLNESS

Weight Wellness Lifestyle Program (6-8 weeks program of weekly meetings)

Weight Wellness participants develop a personalized plan for weight management (loss and/or maintenance). Participants learn skills to manage both their eating habits and physical activity for a lifetime.

Top Fuel for Top Performance (2 days)

This program provides nutrition information for individuals who are physically active, training for athletic events or preparing to deploy. Topics include: everyday eating, pre/during/post exercise nutrition, meal planning and supplements.

ADDICTION AWARENESS & PREVENTION

Alcohol, Other Drugs, Gambling & Gaming Supervisor Training (1.5 day) *MITE code

Topics include: AODGG training topics include: preventing substance use and addiction related problems in the workplace, CAF drug & alcohol policies and resources available to help.

Butt Out (Self-help - 2 meetings)

This workbook based self-help smoking cessation program is designed to help individuals overcome nicotine addiction. Registration for this program is on-going.

INJURY PREVENTION & ACTIVE LIVING

Injury Reduction Strategies for Sports & Physical Activity (4 hrs)

The IRS program provides CF personnel with the latest scientific evidence concerning injury prevention in sports and physical training.
